FAIRPLAY BEACH REPAIRS COMPLETE AND OPEN TO THE PUBLIC

Fairplay, Colo. (October 4, 2018) – As of October 4, 2018 both Beach Road and the entire Fairplay Beach Area are once again open for public use.

American West Construction LLC has completed repairing infrastructure damaged by the 2015 flood including: the spillway located by the water plant off Beaver Creek; Beach Road; and the Fairplay Beach Reservoir.

Town of Fairplay Mayor Frank Just is excited about the completion of these repairs stating, “The Fairplay Beach area is a wonderful space for both locals and visitors alike. It also has some of the finest fishing in the area. We are very proud to announce that the Beach area is open again and are excited to continue to improve the area via our Fairplay River Park Project.”

There will be additional construction surrounding the Fairplay Beach in coming years as the Town of Fairplay works on the Fairplay River Park project. The River Park Project will expand recreational amenities along the Middle Fork of the South Platte both to the east and west of the Fairplay Beach. Additionally, there will be a focus on the improvement of stream and riparian health along the river corridor.

For more information, please contact **Tina Darrah, Town Administrator**, at (719) 836-2622 or via e-mail at tdarrah@fairplayco.us.
